ADVANTAGES

- "Be" about itself to separate the very being of the own music, .. in if you mean the handicap and losing one's self through the staff I own musical .. that is the very essence I rock,.. .the virtue is to keep the music I own staff and separate staff / emotional and simply united by sound, .. to know that I own this merged as rock so this .. I mean ... I personal and musical preserving without altering its essence, that is the virtue ..

- ◉ The rock is a pure and ingenious revolutionary music, authentic, 100%.
- ◉ True, some songs are the opposite, but that is diverted to the Black and Death Metal, which I regard as nonsense. Those who think that rock is bad is because they have an idea too widespread.
- ◉ "The rock is satanic", "Rock is diabolical ...". I never get tired of hearing that. And it's bad what I hear?

- ◉ rock is not any genre of music is a way to express what you feel like cobain kurt that qeria say in their songs of their problems and as good also to and varying degrees of rock to and many rockers who see it as if it were satanic or simplemete they try to worship but also no normal rock so to speak as the alternative rock so if you have positive things

- ◉ The positive side of rock in my country Argentina is that the groups have a very harmonious metal, with incredible solos and lyrics that are poetic and not at all aggressive.

DISADVANTAGES

- ◉ which it is a heavy genre
- ◉ many people change their way of being to hear that kind of music
- ◉ They change their way of thinking and acting dress

- many come to the limit of wanting to be like them
- many become ill and the artist idolize and want to imitate him
- some become addicted to drugs
- the music is very heavy and very regardless frequency for people who do not listen to rock
- they think and believe I am to hear bad essa pesadoas songs and is just a crazy screaming out loud

THANK YOU VERY
MUCH FOR YOUR
ATTENTION
